

Product Information Sheet

CUT-EASE Aluminium Cutting and Grinding Lubricant

Neat Cutting Oil

Product overview

Cut-Ease is a neat cutting oil optimized for aluminium machining to ensure a clean-cut edge and long tool life as well as minimizing aluminium clogging and tooling.

Locally manufactured and specifically formulated to suit aluminium and soft metals such as brass and copper, Cut-Ease is a natural based, high-quality lubricant with low viscosity. It is an easy-to-use, environmentally friendly solution to everyday issues in the fabrication and construction industries.

Applications

Cut-Ease aluminium cutting fluid is purposed for pneumatic and hydraulic delivery systems as well as manual application.

Advantages

Highly cost effective when compared with synthetic equivalents.

Cut-Ease is a natural based product formulated specifically for aluminium machining.

Eliminates fusion creates a smoother, cleaner cut.

Natural based product formulation containing no teflon or silicone ingredients.

Easily removed with warm soapy water, eliminating the need for alcohol or solvent based chemicals.

Direction for use

Fill application unit with Cut-Ease Lubricant and adjust airline pressure to ensure that sufficient product is applied to the cutting surfaces.

Oil can be applied by manual methods such as brushes, to specific areas requiring lubrication (for milling and drilling)

Product	Neat use oil
Storage	10-40 °C.
Pack size	2L or 5L
